# MULTILEDSTM ARCHITECTURAL

## NEW APPLICATIONS

Multileds™ have not been unnoticed by architectural lighting designers and are more often used for artistic designs. Past architectural projects proof the versatility of Multileds™. Multileds™ have been installed in floors, walls and ceilings of museums, corporate buildings, and stores. Special eye-catchers like bars, artistic objects and atmospheric lighting are also no problem with the use of Multileds™ tiles.

## A COLORFUL WORLD

Influence peoples mood by changing colors of the world around them. Because Multileds™ are fully dimmable and can change more than 16 million colors, possibilities are literally unlimited. The unique construction of Multileds™ makes integration easy and reliable.

## HIGH QUALITY PRODUCTS

If it comes to strength, quality, and color, Multileds™ are the best choice for your project. Multileds™ are always custom build and can be modified to any situation.

## SPECIAL EFFECTS

Multileds™ can be equipped with custom illuminated logos and text to impress visitors at business receptions, museums or other special projects.

## HOW IT WORKS

Multileds™ tiles can be separated in single panels for integration in fixed installations. It's even possible to change measurements and shapes on request. Separate OEM Multileds™ can be easily installed in walls or other objects due to their minimal height and therefore providing a wide spectrum of lighting design solutions.

For any advise or information regarding Multileds™ architectural applications, please don't hesitate to contact us.
